

Excerpt from An Essay on the Principle of Population, Vol. 2 of 3: Or a View of Its Past and Present Effects on Human Happiness; With an Inquiry Into Our Prospects Respecting the Future Removal or Mitigation of the Evils Which It Occasions As the parochial registers in France, before the revolution, were not kept with particular care, nor for any great length of time, and as the few which have been produced exhibit no very extraordinary results, I should not have made this country the subject of a distinct chapter, but for a circumstance attending the revolution, which has excited considerable surprise. This is, the undiminished state of the population in spite of the losses sustained during so long and destructive a contest.
