

Dawn of the Life

DAWN OF THE LIFE is a composite of two projects, viz. The Transcendental Future (1980) and The Way of Evolution (1981) and therefore combines dialogues with essays in a largely philosophical text which has the merit of both a lengthy introduction and a summational aphoristic appendix, as per custom for John O'Loughlin's works at this comparatively early stage of his development as a self-taught philosopher, or thinking literary writer. The dawn in this instance is a new one, and the life has more to do with eternity than with anything temporal, much less infinite or even finite.
