

The age of Charlemagne was a crucible for change in the history of Europe, bridging the divide between the medieval and the classical worlds and setting the political and cultural tone for centuries to come. This book focuses directly on the reign of Charlemagne, bringing together a wide range of approaches and sources from the diverse voices of fifteen of the top scholars of early medieval Europe. The contributors have taken a number of original approaches to the subject, from the fields of archaeology and numismatics to thoroughly-researched essays on key historical texts. The essays are embedded in the scholarship of recent decades but also offer insights into new areas and new approaches for research. A full bibliography of works in English as well as key reading in European languages is provided, making the volume essential reading for experienced scholars as well as students new to the history of the early middle ages.

East of Paris: Sketches in the Gactinai, Bourbonnais, and Champagne, Multiple Intelligences: A Collection, Tales and traditions of the Eskimo: With a sketch of their habits, religion, language and other peculiarities, Clinical researches on disease in India, The Cambridge Medieval History - Book IV: The Fall of the Western Roman Empire, The domestic life of Thomas Jefferson, The delinquent child and the home, A history of education in Indiana, A Vagabond in New York,
