

Ethics and Anthropology: Ideas and Practice

Ethics and Anthropology comprehensively embraces issues and dilemmas faced in all four of the disciplines fields. Not merely a subject to be considered when seeking the approval of institutional review boards, ethics is anthropology. Fluehr-Lobban explores the critical application of core ethical principles: do no harm, apply informed consent in all stages of research, practice transparency, collaborate from the initial stages of crafting a proposal and executing research through writing and publication of findings. She provides a frank, up-to-date consideration of best practices and trends and incorporates recommendations from the most recent AAA Code of Ethics. To help students understand the art of ethics in principle and in practice, she draws on anthropological history and discourse as well as cross-cultural and interdisciplinary examples; questions for discussion round out each chapter.
