

Machinery and electronic textbook series of vocational and technical education: engineering mechanics(Chinese Edition)

Paperback. Pub Date: 2011 Jun Pages: 117
Publisher: vocational technical education.
China University of Mining machinery and electronic textbook series: engineering mechanics division three. 14 chapters. the first of statics. including statics the basis of the plane system of forces. space force. the second material mechanics. Including the basic concepts of mechanics of materials. axial tension and compression. shear and compression. circular shaft torsion beam bending strength bars when combined deformation. bar. Title III. kinematics and dynamics. including particle motion mechanics. mechanics of rigid body motion. kinetic energy theorem. happened Law. Vocational and technical education Electromechanics Series Textbook: Engineering Mechanics as mechatronics. mechanical and manufacturing engineering professional teachers and textbooks. Section II of the basic concepts of C...
