

Sex Offenders: Punish, Help, Change or Control?: Theory, Policy and Practice Explored (Routledge Frontiers of Criminal Justice)

Sex offending, and in particular child sex offending, is a complex area for policy makers, theorists and practitioners. A focus on punishment has reinforced sex offending as a problem that is essentially other to society and discourages engagement with the real scale and scope of sexual offending in the UK. This book looks at the growth of work with sex offenders, questioning assumptions about the range and types of such offenders and what effective responses to these might be. Divided into four sections, this book sets out the growth of a broad legislative context and the emergence of child sexual offenders in criminal justice policy and practice. It goes on to consider a range of offences and victim typologies arguing that work with offenders and victims is complex and can provide a rich source of theoretical and practical knowledge that should be utilised more fully by both policy makers and practitioners. It includes work on female sex offenders, electronic monitoring and animal abuse as well as exploring interventions with sex offenders in three different contexts; prisons, communities and hostels. Bringing together academic, practice and policy experts, the book argues that a clear but complex theoretical and policy approach is required if the risk of re-offending and further victimisation is to be reduced. Ultimately, this book questions whether it makes sense to locate responsibility for responding to sexual offending solely within the criminal justice domain.
